I expect to receive Sid's modified proposal tomorrow morning. The final draft looks exceptional. How many copies do you wish? (It will also come with a few CV's of the prospective post docs who will work on the project. I'll make one copy of those for your inspection.) Thanks.

When I plan a trip to INBIFO, I try to give a little of us to them as they dump all of them on me. In other words, I try to make it an exchange rather than a one-way event. I thought it would be valuable if each of you took the time to explain who you were, the projects you were working on, the business impact of your work and where it fits into the big picture.
Are you game?
Perhaps a few transparencies and 10-15 minutes would do it.
Thanks,

Cathy
P.S. Other suggested topics would be welcome.
For example: "How a cigarette works", etc.
